LTS A-Eye Compact Surveillance Tower

*Delivering value without
compromising on quality or
specification*

The LTS A-Eye is a new to market compact surveillance tower with an angled design *exclusive* to LTS.

Unlike some of the other value options in the market, our A-Eye tower doesn't limit the feature set or quality of the build in order to achieve a competitive price. Therefore the A-Eye tower maintains all of our premium tower features with 110 - 230v mains hook up supported by default, weatherproof enclosures with LTS PCB tower controller, full telemetry suite and fuel cell technology.

Equipped with cameras to provide full 360 degree coverage, loudspeaker for audio challenge and GPS tracking.

Optional methanol fuel cell add-on to guarantee system up time even in challenging conditions and through the UK winter.

All manufactured and supported in the UK with our Premier LTS Tech Support Team.

Key Features

- 4.5m telescopic mast
- 360 degree views with analytics
- IoT Router for connectivity
- Loudspeaker for audio challenge
- LTS PCB and tower controller
- Fibreglass vandal resistant solar panel
- 110 - 230v mains connection supported
- Optional Methanol fuel cell
- Fully weather proof internal enclosures
- Full telemetry suite with remote portal
- GPS location tracking with geofence
- 250 - 300kg equipped weight
- Made in the UK
